01 PROFILE

Experienced Frontend Developer specializing in React.js and Next.js with strong proficiency in modern TypeScript and component architecture. Proven expertise in building scalable, high-performance web applications with Restful API integration. Skilled in state management, form handling with React Hook Form and Zod, and data fetching optimization with SWR. Quick learner with hands-on experience in full-stack development, version control, and AI-assisted coding. Ready to contribute to dynamic development teams and deliver production-ready solutions.

02 EDUCATION

Damascus University

Bachelor's Degree

Information Technology Engineering

HR Certification Institute

Higher Diploma in Human Resource

03 WORK EXPERIENCE

Nov 2025 — Present

Remote

Front-End Developer

- Developed responsive, accessible interfaces using semantic HTML, modern CSS, and JavaScript.
- Built reusable React components and modular architecture for faster iteration and maintainability.
- Integrated REST and GraphQL APIs; implemented robust form handling (React Hook Form + Zod) and optimized data fetching with SWR.
- Improved performance with code-splitting and lazy loading; ensured cross-browser consistency.
- Maintained a clean, scalable codebase aligned with internal standards and best practices.

Jun 2024 — Oct 2025

remote

front end developer

- Built responsive, interactive user interfaces at Osous Technology.
- Translated UI/UX designs into clean, reusable front-end code.
- Optimized website performance and loading speed.

- Collaborated closely with the development team.
- Delivered high-quality solutions with strong technical and communication skills.

Mar 2024 — Jun 2024

remote

front end developer

- Developed interactive web pages using HTML, CSS, and JavaScript for Business Flow.
- Built reusable components with React.
- Integrated RESTful and GraphQL APIs for dynamic data handling.
- Ensured compliance with company policies and internal coding standards.
- Maintained clean, scalable codebases to support rapid feature delivery.

04 PERSONAL PROJECT

SaaS Landing Page (React Launch)

Built a responsive, production-ready SaaS marketing page with React and Tailwind CSS.

- Composed reusable components and a scalable layout system for fast iteration.
- Implemented accessible forms and semantic markup to improve usability.
- Optimized assets and lazy-loaded media for faster initial render on mobile.
- Ensured cross-browser consistency and clean, maintainable styles.

Resume Builder

Resume builder built with React and Tailwind CSS.

- Delivered a clean, responsive interface with reusable components and clear state flows.
- Improved usability with intuitive forms, sensible defaults, and helpful error states.
- Ensured accessibility and cross-browser consistency to broaden reach.
- Refined rendering and styles to keep interactions snappy on low-end devices.

Villa View

Built a React application to browse villas with images, price, and location.

- Developed a responsive, card-based gallery with mobile-first design.
- Added client-side filtering and sorting by price/location to speed up discovery.
- Implemented pagination and image lazy loading to keep scrolling smooth on larger datasets.
- Wrote clean, reusable components to enable quick feature additions.

### Clinic Center Management System

Clinic management dashboard for appointments, patients, and staff using React, TypeScript, and Material UI.

- Built CRUD workflows with robust form validation (React Hook Form + Zod) and optimistic UI updates.
- Integrated RESTful API for scheduling and records; centralized state for predictable data flows.
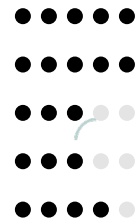

- Implemented role-based navigation and protected routes for admin and staff users.
- Designed responsive tables, filters, and detail views to streamline daily operations.

Laravel	●●●○○	Material UI	●●●●○

06 INTERNSHIPS

Feb 2024 — Jul 2024

full stack developer

- Designed and developed modern, responsive web applications tailored to client requirements.
- Built scalable and reusable front-end components using React and modern JavaScript frameworks.
- Collaborated directly with clients to gather requirements, provide technical guidance, and deliver solutions.
- Integrated RESTful and GraphQL APIs to handle dynamic data efficiently.
- Optimized performance, accessibility, and SEO best practices across projects.
- Maintained clean, well-documented, and maintainable codebases for long-term scalability.
